

**Traceability Document of Specific Gravity Calibrator
for Urine Analyzer**

Declaration of Traceability for Urine Analyzer Specific Gravity Standard Solution

Product Name: Urine Analyzer Specific Gravity Standard Solution

1. Traceability Description

In accordance with ISO 17511 and NCCLS regulations, the values of the urine analyzer's specific gravity standard solution are strictly traceable to a refractometric specific gravity meter.

二、Quantity traceability procedure

According to ISO 17511:2003 "In vitro diagnostic medical devices - Measurement of quantities in biological samples - Metrological traceability of values assigned to calibrators and control materials," the values of the urine analyzer specific gravity standard solution are strictly traceable to a refractometer.
